

Low Pressure Hose & Reel

High Pressure Hose & Reel

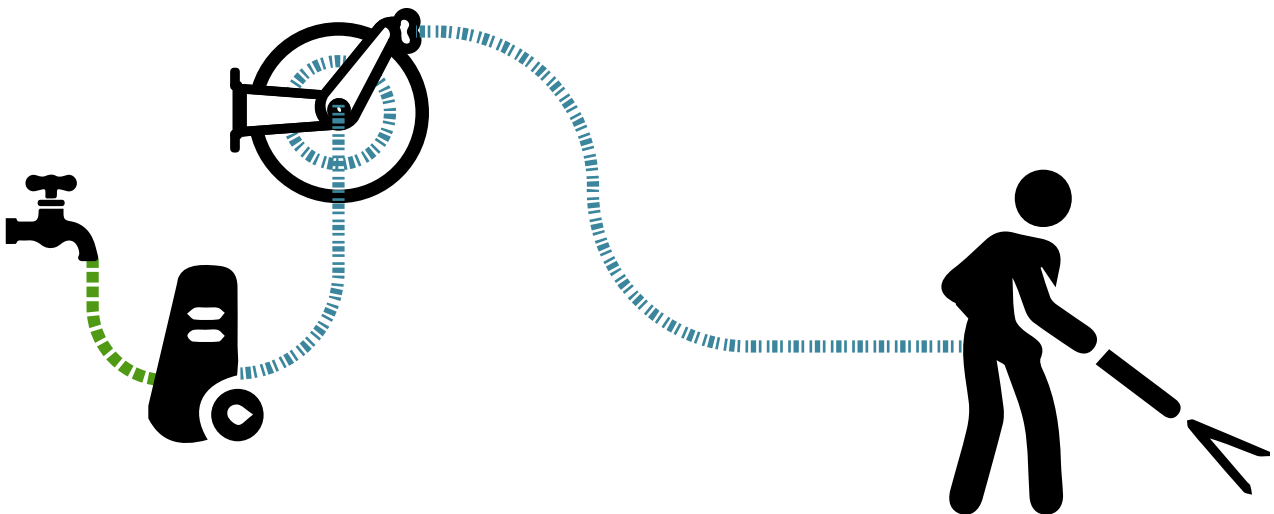

## Static Setup

This setup uses the jet wash unit to feed the hose reel with high pressure water.

This setup requires high pressure hose and reel

- ✓ • Most convenient and professional setup
- Jet wash unit stays in the same place all the time and you only have to pull out the hose
- Recommended setup for high usage

## Mobile Setup

This setup uses the hose & reel to feed low pressure water to the jet wash unit which then provides the high pressure water.

This setup can use a low pressure hose and reel

- ✓ • Recommended if you have multiple reels/water points and a single jet wash unit
- Can use low pressure hose and reel so better for budget
- Can also be use for low pressure watering/filling
- The jet wash unit hose is used in addition to the hose on the reel providing extra overall length
- ✗ • You have to take the pressure wash unit to where you need it
- You have to disconnect the jet wash unit to return the hose
